Definitions

Investment Objectives

Your investment goal(s) based on your risk tolerance and time horizon.

- Protection of Principal: Relatively lower risk investments with the goal of preserving the money invested
- $\bullet \;\;$ Income: Investments with regular payments of interests, dividends or other income
- Growth: Investments with a history of future potential for capital gains, but with a higher risk of loss
- Speculation: Investments with the possibility of large profits, but also pose a higher than average possibility of loss

Risk Tolerance:

The degree of uncertainty that you can handle in regard to a negative change in the value of your portfolio.

- Conservative: willing to forego upside potential to avoid downside fluctuations
- Moderately Conservative: adverse to large short-term downside fluctuations, seek more return with a little less income

- Moderate: generally investing for the long term, with a mix of asset classes; willing to
 accept some risk for long term good return with investments that may go up less than
 the markets as a whole, but should also go down less when markets decline
- Moderately Aggressive: willing to take on more downside risk than the markets in order to achieve long term performance better than the markets. More emphasis on making money than on preventing loss
- Aggressive: looking to substantially outperform the market and willing to accept significant risk (losses of 40% or more in a quarter) to do so. No emphasis on preventing loss

Investment Time Horizon

The total length of time that you expect to hold a security or portfolio.

- Near term: immediate liquidity
- Very short: six months
- Intermediate: three to ten years
- Long: greater than ten years
